

SHAHID TAMBOLI

AI Engineer | LLM • RAG • Agentic AI | Full-Stack Developer

Sangli, Maharashtra, India [LinkedIn](#) • [GitHub](#) • [Portfolio](#) • [LeetCode](#)

SUMMARY

AI/ML engineer (final-year B.Tech, AI & Data Science) with hands-on experience shipping production AI systems and full-stack applications for real, paying clients. Skilled in Python, FastAPI, LLM integration, RAG, computer vision, and React/Next.js — with measurable impact including 60% faster order processing and 35% fewer simulated runway conflicts.

TECHNICAL SKILLS

Programming: Python, Java, C++, JavaScript, SQL

AI / ML: Machine Learning, Computer Vision, LLM Integration, RAG, Vector Search, Prompt Engineering, Agentic AI Systems

Web & Backend: FastAPI, Flask, REST APIs, React.js, Next.js, HTML5, CSS3

Tools & Platforms: Git, GitHub, Docker, PyTorch, Embeddings, Semantic Search, BeautifulSoup, Playwright

Core CS: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS

EXPERIENCE

Full-Stack & Agentic AI Intern — Pixel11 (Startup) [\[View Repo\]](#)

Nov 2025 – Feb 2026

- Built scalable web-scraping pipelines (Python, BeautifulSoup, Playwright, Stealth) that extracted management-level contact data from company websites into structured APIs and dashboards.
- Integrated LLM APIs into automation workflows and designed REST APIs powering AI-driven business processes.
- Built scalable backend services that processed structured and unstructured business data for intelligent retrieval.

PROJECTS

AI-Powered Digital Twin for Critical Infrastructure [\[View Repo\]](#)

Digital Twin platform for infrastructure risk monitoring — Sangli District | Python, FastAPI, Computer Vision, Machine Learning, GIS

- Architected a Digital Twin platform integrating GIS, sensor/IoT, environmental, satellite, and historical data with a FastAPI backend, combining crack detection, flood-risk prediction, and time-series forecasting into a centralized Risk Manager for risk scoring and alert escalation.

QR-Based Ordering & Billing System — Client Project [\[View Repo\]](#)

Full-stack smart restaurant management platform | Python, Flask, React.js, Vite, REST APIs, SQL

- Built and deployed a QR-based ordering and billing platform for a real paying client, with an admin dashboard for menu, orders, and payments; automated billing workflows cut order-processing time by 60%.

Intelligent ATC Slot Allocation System (SkySlot AI) [\[View Repo\]](#)

AI-based air traffic control optimization system | Python, Machine Learning, Streamlit, Data Analysis

- Designed AI-based runway slot-scheduling algorithms that reduced simulated runway conflicts by 35%, with a dashboard for aircraft queue and runway-utilization monitoring.

Guts — Enterprise AI Assistant (LLM + Agentic AI) [\[View Repo\]](#)

Voice/text-based intelligent assistant | Python, Flask, Streamlit, FastAPI, RAG, Vector Database, REST APIs

- Built a modular voice/text assistant powered by a RAG pipeline and vector database, integrating weather, search, and time/date utilities via external APIs; architected for future LLM-based extensions.

Samruddhi Polyplastic — Company Website (Freelance) [\[View Repo\]](#)

Role: Web Developer | React, Next.js, JavaScript, HTML5, CSS3, Netlify

- Designed, built, and deployed a responsive, SEO-optimized company website for a plastics manufacturer, working directly with the client from requirements through production launch.

EDUCATION

Annasaheb Dange College of Engineering and Technology, Ashta

Expected Graduation: 2027

B.Tech, Artificial Intelligence and Data Science — (4th Year)

CERTIFICATIONS

Anthropic — Claude & AI Certifications (5 courses)

- NPTEL — Leadership & Team Effectiveness (Elite)
- Forage — Walmart, Deloitte & Tata Virtual Experiences

ACHIEVEMENTS

Sports Coordinator, ADCET • Event Coordinator, Discovery & Neuroverse Tech Fest (300+ participants), 2025–26 • University Zonal & Inter-Zonal Boxing Gold Medalist • National-Level Boxing Participant, 2026
